Cyber Bullying

WD-302

Introduction

As we all know, there are so many helpful usages of internet to teenagers nowadays. However, this social media or the biggest world-wide communication network of computers have mostly can cause of risk and threats too, which people should learn how to be aware of it. One of this is cyberbullying. A cyberbullying always happened through over digital devices like cell phones, computer and tablets. It is usually occurred in digital forums, comments, post photo, online gaming communities, and vlog content that might be seen in online public view with full of making fun of an individual, hatred comment, mean comments and a harmful information to the person's reputation. This cyberbullying can impact schools' admissions, employment and other areas of life of an individual.

Problems and / or Issues

Cyberbullying is bullying that occurs through the use of digital devices such as mobile phones, laptops, and tablets. Cyberbullying can occur via SMS, text messages, and applications, as well as online in social media, forums, and gaming where people can access, engage in, or share content. Online bullying, like other forms of bullying, may also result in severe long-term consequences. The stress of being constantly upset or afraid can cause problems with mood, energy, sleep, and appetite. It can also make you feel jittery, nervous, or sad. If someone is already depressed or anxious, cyberbullying may exacerbate their situation. It is not just the victim of bullying who suffers. Cyberbullying will result in severe consequences.

Objectives

- To raise the issue to all who uses social media in their daily lives
- To seek social support for those who are being cyber bullied
- To avoid stressful situations and manage the problem in a calm manner
- To avoid stressful situations and manage the problem in a calm manner
- To emphasize not only to kids but also to other people that they will not lose civil rights if they are being cyberbullied
